

SPECIAL RELEASE

Pamplona population slows down to 1.04 percent growth per year 2015 Census of Population Results

Date of Release: October 24, 2017
Reference No. 2017-81

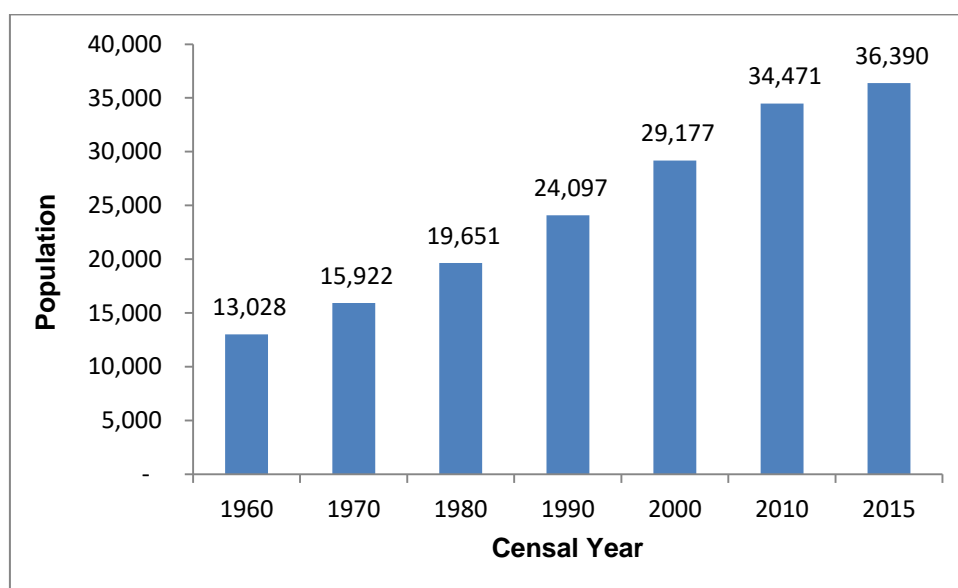

Population of Pamplona doubles in 68 years

Based on the 2015 Census of Population (2015 POPCEN), Pamplona posted a total population of 36,390 persons as of August 1, 2015. This is larger by 1,919 persons compared to its total population of 34,471 persons counted in 2010. The increase in the population count from 2010 to 2015 translated to an average annual population growth rate (PGR) of 1.04 percent. This is lower than the 1.68 percent annual PGR of the municipality between the census years 2000 and 2010.

The population of Pamplona would double in 68 years if the average annual PGR recorded at 1.04 percent during the period 2010 to 2015 continues.

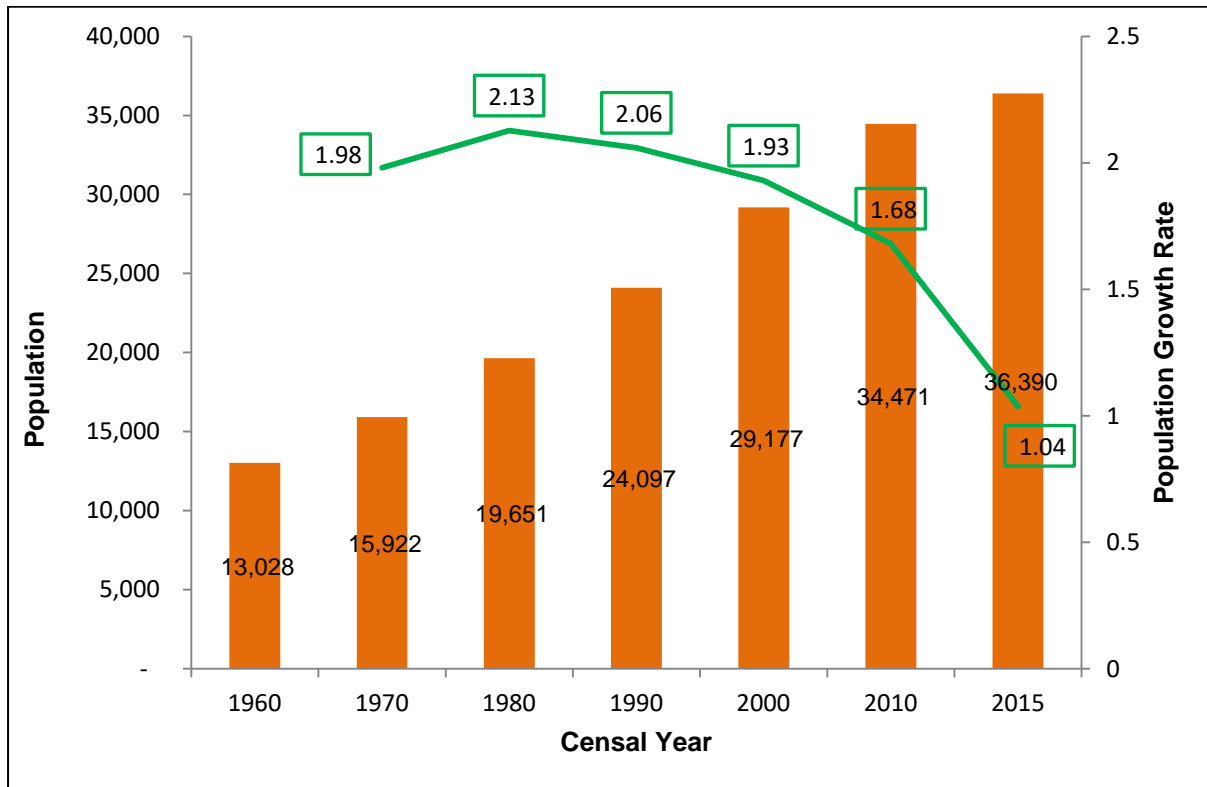

Pamplona population increased by more than 7,000 persons in the last 15 years from only 29,177 in the year 2000 to 36,390 in 2015.

Annual Population Growth Rate at 1.04 percent

The growing population size of Pamplona comes at a much slower pace as the annual population growth rate dropped to 1.04 percent in 2015.

This still translates to an increase of about ten persons per 1000 population per year. Historically, the annual population growth rate of Pamplona was fastest at 2.13 percent from 1970 to 1980 and was slowest at 1.04 percent from 2010 to 2015.

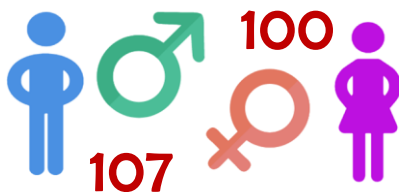

Sex ratio is at 107 males per 100 females

Of the 36,378 household population in 2015, males accounted for 52 percent while females comprised 48 percent. These figures resulted in a sex ratio of 107 males for every 100 females, which is lower than the sex ratio recorded in 2010 at 108 males per 100 females.

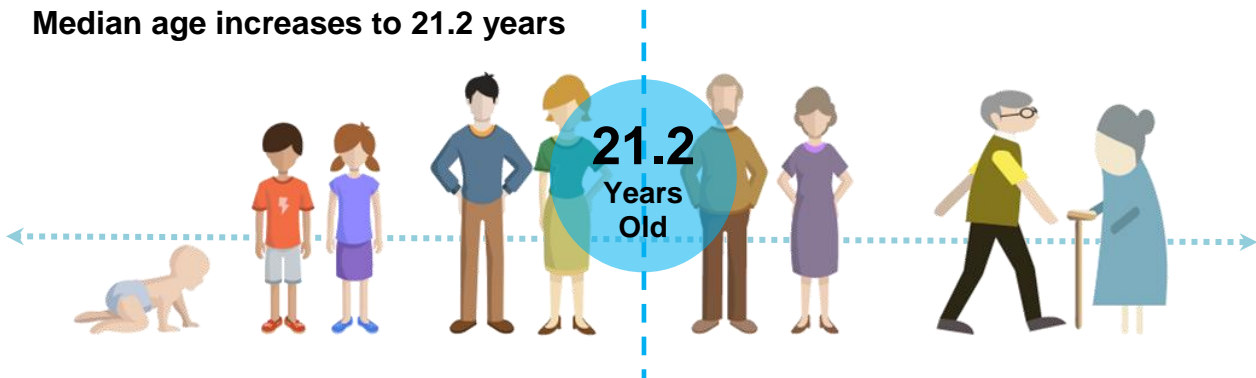

Table1. Sex Ratio and Median Age of Household Population, Pamplona: 2010-2015

Year	Sex Ratio	Median Age
2015	107	21.2
2010	108	20.2

Source: Philippine Statistics Authority, Census of Population Results 2015

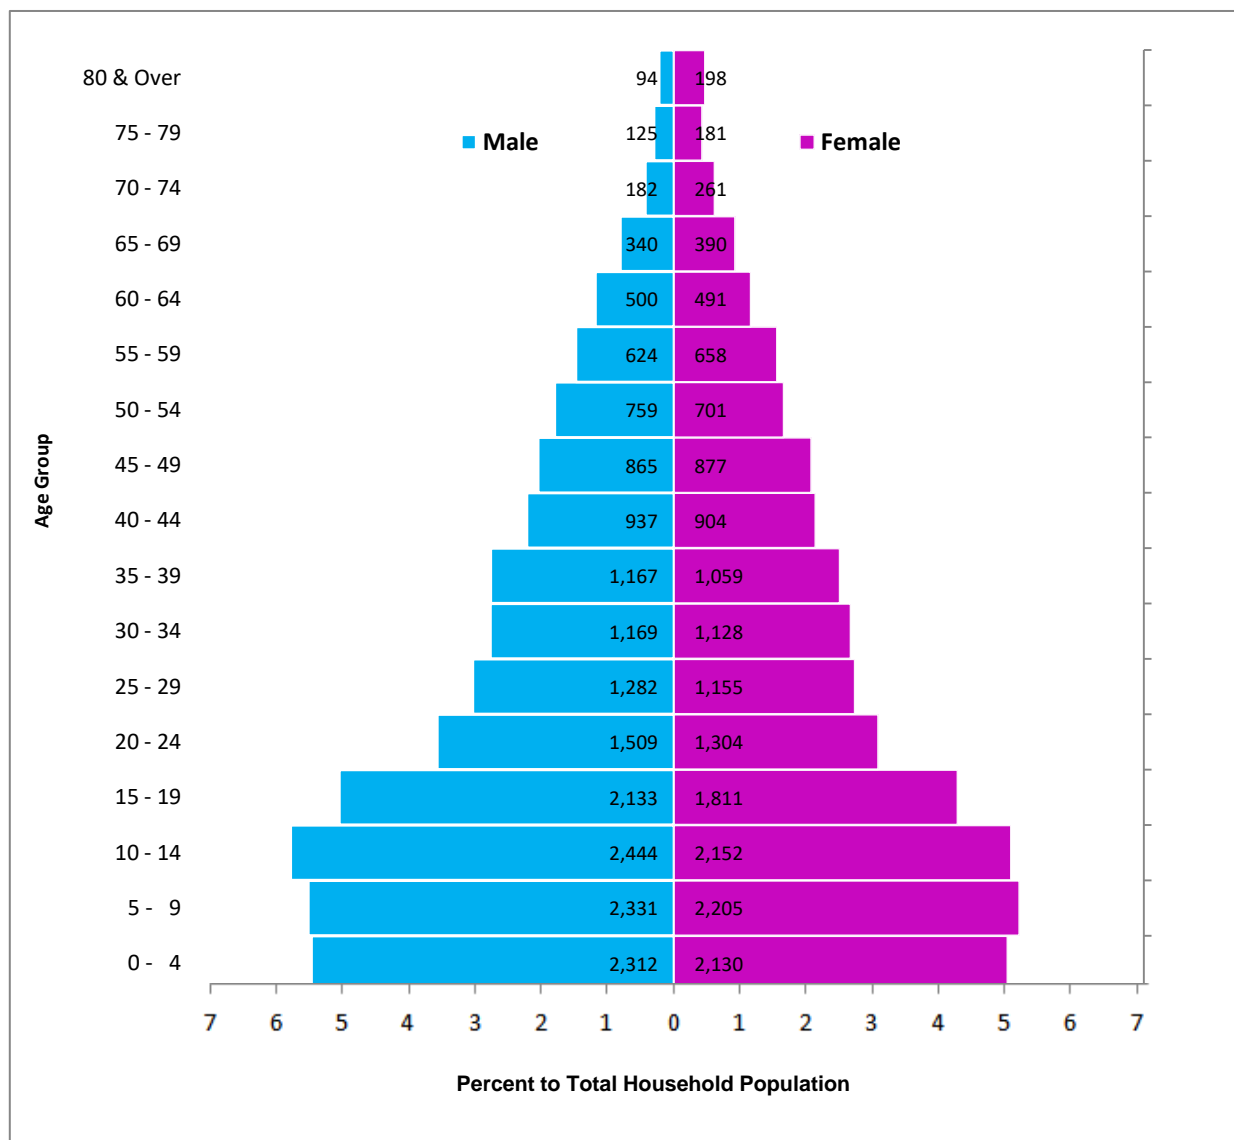

Median age increases to 21.2 years

In 2015, the median age of the population of Pamplona was 21.2 years, which means that half of the population was younger than 21.2 years. This is higher than the median age of 20.2 years that was recorded in 2010.

More than half of the household population are of voting age

The voting-age population (18 years and over) accounted for 20,240 persons or 55.64 percent of the household population of the city in 2015, up from 54.16 percent in 2010. There were more males (50.94 percent) than females (49.06 percent) among the voting-age population.

Dependency ratio decreases to 73 dependents per 100 persons in the working age group

In 2015, the young dependents (0 to 14 years) comprised 37.31 percent of the household population while the old dependents (65 years and over) comprised 4.87 percent share. The working-age population (15 to 64 years) accounted for the remaining 57.82 percent.

Moreover, about two in every five persons (37.31 percent) were under 15 years old. Children aged 10 to 14 years (12.63 percent) comprised the largest age group, followed by those in the age groups 5 to 9 years (12.47 percent) and 15 to 19 years (10.84 percent). Males (52.31 percent) outnumbered females in the age groups 0 to 49 years. On the other hand, there were more females (52.33 percent) than males in the older age groups (50 years and over).

The overall dependency ratio was 73, which indicates that for every 100 working-age population, there were about 73 dependents (65 young dependents and 8 old dependents). This ratio is lower than the dependency ratio in 2010, which was recorded at 75 dependents per 100 working-age population (68 young dependents and 7 old dependents).

Senior citizens constitute 7.6 percent of the household population

People who are regarded as senior citizen are those aged 60 years old and over. In Pamplona, they made up 7.6 percent of the 36,378 household population in 2015. Among the senior citizens, females (55.1 percent) outnumbered the males (44.9 percent).

One elderly for every five children below 15 years

In Pamplona, the ageing index or the proportion of persons aged 60 years and over per 100 persons under the age of 15 years was computed at 20.3 percent in 2015. This means that there is about one person aged 60 years and over for every five children under 15 years old.

There are more males than females among the never-married persons

Of the household population 10 years old and over, 45 percent were never married while 40.9 percent were married. The rest of the population were categorized as follows: in common-law/live-in marital arrangement (8.5 percent), widowed (4.7 percent), and divorced/separated (1 percent).

Among the never-married persons, 57.5 percent were males while 42.5 percent were females. For the rest of the categories for marital status, the females outnumbered the males.

About two in every five of the household population are of school age

In 2015, the school-age population (5 to 24 years old) in Pamplona comprised 43.7 percent or 15,889 of the 36,378 household population. In 2010, the school-age population was 45 percent of the 15,504 household population. Of the population who were of school age, the males made up 53 percent, while the females, 47 percent. Also, of the population who were of school age, 70.8 percent are currently attending school in 2015.

More females have higher levels of education

Of the household population aged five years and over, 43.8 percent had attended or completed elementary education, 38.5 percent had reached or finished high school, 6.3 percent were college undergraduates, and 3.9 percent were academic degree holders.

Among those with academic degree, the females (62.1 percent) outnumbered the males (37.9 percent). Similarly, more females (68 percent) than males (32 percent) had pursued post baccalaureate courses.
